

Images are provided in the following formats.
SVG, SVG (Outline), DXF, EPS, PNG

For tips on how to load the images to your own software
consult online instructions about your own device.

Each layer is cut out on it's own from a peice of heavy paper at least
8.5x11 for an 8 inch framed shadow box and foam tape inserted between
most layers.

Alternate colors can be selected as desired.

Layers:

Green Background
Black Mantling Background
Gold Mantling Foreground
Red Shield Layer
Grey Helmet Layer
Black front frame and symbol
background
Gold Symbol Foreground

The default construction method is for the
first 5 layers to be put together with
several mm thick foam tape giving
additional depth to apperance.
The last two layers should be glued
together with a gluepen, or contact
cement and those layers then can be
glued to the remainder of the layers with
glue or foam tape as desired.
